

Homework week commencing 22nd May 2023

I really enjoyed reading your fantastic explanation texts about how plants grow. Make sure that you collect your house points. Well done everyone!

As we will have a half-term break next week, you'll have two weeks to complete your next homework task. We are continuing with our Science theme on plants and this week I would like you to explain the different ways seeds disperse. You will have learnt about this in our lesson. Once again the task is on **Purple Mash**.

All the best!

Please complete your challenge by Monday 5th June.

Have a wonderful half-term break Year 3!

Kind regards,

Mrs Padam
