

## Homework week commencing 28<sup>th</sup> November 2022

Well done for practising your multiplication and division facts last week. I hope you enjoyed building your multiplication monster!

As the cold is starting to set in, I would like you to have a go at designing your very own warm woolly jumper! We have worked very hard on our Art this week, learning about different types of lines, so this should be a lovely activity where you can show your creative side. All the best!

Any questions, please don't hesitate to contact me via email.

Kind regards,

Mrs Padam
