

Homework week commencing 7th November 2022

Great match up and descriptions of the different animals and the diet they consume. Make sure that you pick up your house points!!

The next task is still on **Purple Mash** under 2Dos. We are continuing with our Science topic on Nutrition and Movement. As we have been learning lots about the human skeleton and how it functions, I would like you to write a small report about it, using the knowledge you have gained from our lessons, but also using the information on Purple Mash to support your writing.

All the best!

Any questions, please don't hesitate to contact me via email.

Kind regards,

Mrs Padam
