

1.10.21

This week we have been learning about aerial view. For your home task I would like you to draw a room in your house from an aerial view. I have put an example below.

Extension

Use a compass (you can find one on most phones) to answer the following questions.

- What objects can you find on the North side of the room?
- What objects can you find on the South side of the room?
- What objects can you find on the West side of the room?
- What objects can you find on the East side of the room?

Example

On the east side of the room, I can see a computer. On the west side of the room, there is a lamp.
