

Bears

Fact Cards

American Black Bear

American black bears are usually black or brown.

They eat mainly berries, nuts, grasses and insects.

Most American black bears hibernate during the cold winter months.

They are very good at climbing trees and swimming.

They are usually shy and easily frightened.

They can run up to 35 miles per hour.

That's as fast as a car!

Brown Bear

Brown bears live in lots of different countries around the world.

They live in mountains, forests and meadows.

Brown bears have super strong shoulder muscles. This helps them to dig up roots and tear apart logs to find food. They can even move rocks!

They use their sharp claws to dig through hard soil when making dens.

Brown bears like to eat grass, fruit, insects and the roots of plants.

If they are hungry enough they will hunt small animals.

Brown bears that live near rivers like to eat fish, particularly salmon.

Brown bears hibernate in their dens all winter.

They don't even wake up when they have their babies!

Giant Panda

Pandas only live in China.

They are very good at climbing trees.

There are only about 1000 pandas living in the wild. This is because people are cutting down the forests where they live.

Pandas eat mainly bamboo. They have to eat lots of it every day!

Pandas have special paws that help them hold onto the bamboo.
