

Maths Tasks beginning 6 January 2021

Try to complete one lesson a day but remember to do them in the correct order so if you miss a day go back and do that lesson. This week and next, it's all about multiplication.

Video links are below and the activity sheets (and answers for mums and dads) are on our class page - Home Learning.

As you know, the questions on the sheets start fairly easy, then they get harder. Most of you will be able to do most of these questions. If you are confident and need some extra problems to work on, there is an extra sheet. There may also be some extra questions if you are feeling less confident and need more practice at a simpler level rather than struggling on with harder problems.

Video links:

Wednesday	Lesson 1 - Multiply 3-digits by 1-digit https://vimeo.com/486775113
Thursday	Lesson 2 - Multiply 4-digits by 1-digit https://vimeo.com/486775551
Friday	Lesson 3 - Multiply 2-digits (area model) - first part of worksheet https://vimeo.com/488076765

Some of the questions refer to equipment like place value counters but just ask you to look at the pictures. Question 2 on Wednesday asks you to use counters; either miss this out or you could perhaps draw them or find another way.

Lots of our work from now on, uses your times tables facts. If you are finding it a struggle or slow going because you do not know them, practise twice each day for 5 mins on TT Rock Stars or Hit the Button. **Use this lockdown to become ace on your tables!**

You can either do the work on the sheet or in your book.

There is 'squared paper' also on the class page if this helps with layout.
