

COLLAGE

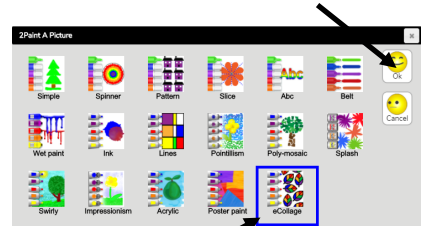

Purpose:

Your task is to try out using a collaging program along with your own photo to create a fantasy scene. The purpose of this work is to see how easy it is to ‘manipulate’ an image (of you) - online safety. You will be doing this in a fun way. However, some people do this in a mean way to cause hurt and upset—you are not going to do this.

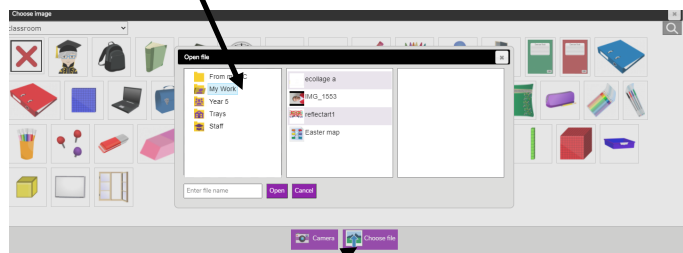

You will use Purple Mash — eCollage (set as a 2Do) along with a photo of you, which is in your ‘My Work’ folder. You will produce a picture, featuring your head/face in some way, along with lots of other pictures.

Ideas: I’m sure you can think of better things but you could try:

- you surrounded by pictures of all your interests
- you in a fantasy scene with monsters and other characters
- your head on the body of another creature/character

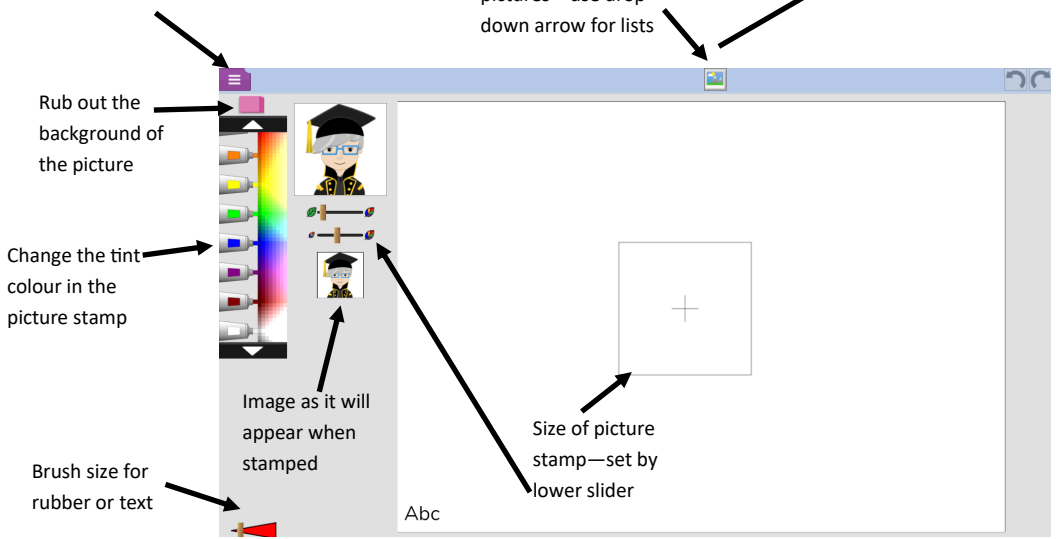

Select ‘My Work’ to find your photo—click it—open

SAVE work when you start and keep resaving as you do more—do NOT wait till the end to save!

Click here for clip art pictures—use drop-down arrow for lists

Undo (redo) button if you make a mistake

Remember to ‘HAND IN’ your work when you have finished because that’s the only way I know you have finished!

If you have done one but want to try another, do these clicks and save it in your ‘My Work’ folder.
